

Expected Outcomes

The expected outcomes of a conference on Outcome-Based Education (OBE) can vary depending on the focus, but here are some key goals and results that could be anticipated:

1. Enhanced Understanding of OBE Principles

Educators will have a clearer idea of how to design curriculum, assessments, and learning strategies around outcomes rather than content coverage.

2. Best Practices in OBE Implementation

Educators, administrators, and policymakers can share their experiences and strategies for successfully implementing OBE in diverse educational settings through case studies and experiences.

3. Policy Recommendations and Frameworks

Collaborations may lead to the creation of standardized frameworks for implementing OBE at different educational levels.

4. Improved Assessment Techniques

Discussions on the role of formative and summative assessments in evaluating student outcomes and improving teaching methods using modern tools and technologies.

5. Capacity Building for Educators

Teachers and faculty members may gain new skills related to curriculum design, teaching methods, and assessment techniques aligned with OBE through participation in workshops and training modules.

6. International Collaboration

Networking opportunities can lead to collaboration among institutions from different countries, enhancing global learning about OBE practices that may even lead to development of global standards.

7. Improved Learning Outcomes for Students

Educators will learn how to develop more effective, student-centered approaches to help students achieve specific learning outcomes.

8. Focus on Graduate Attributes for enhancing Employability Opportunities

Sessions may address how OBE can be aligned with the skills and competencies required by employers, enhancing students' employability.

9. Development of Tools and Resources

Educators might be introduced to new resources and/or templates to assist in designing curricula and assessment tools with a focus on clear, measurable outcomes.

'THEC' 2025

Transforming Higher Education For Future: Education 4.0

26 - 27 Sept 2025

10. Promoting Lifelong Learning and Continuous Improvement

Emphasis on using outcome data to improve future teaching strategies, courses, and programs, and in turn resulting in the improved academic cultural paradigm shift.

In summary, a conference on Outcome-Based Education can lead to greater alignment between teaching, assessment, and learning goals, improving the overall educational experience and better preparing students for their future careers and personal development.
